Exam : **C2090-304**

Title : IBM InfoSphere QualityStage
v9.1 Solution Developer

Vendor : IBM

Version : DEMO

NO.1 You created a job that uses the standardization stage with a new copy of USADDR rule set. The job was successfully compiled, but has an error and will not run.

What is most likely the cause of the problem?

- A. The input file is missing.
- B. The rule set is not provisioned.
- C. The server does not have enough memory.
- D. The rule set has an invalid statement in the pattern file.

Answer: C

NO.2 When building a field level survivorship routine and the same business rule applies to all address columns, what is the most efficient way to do this?

- A. Move all of the address columns to the target field and define a single rule.
- B. You must use the complex survive expression identifying each address field.
- C. Because logic is being applied at the field level all fields need to have a rule defined.
- D. Apply the survivorship rule directly to the available columns and not to the target column.

Answer: B

NO.3 An initial match specification is built and executed- The match executes slower than expected and it is suspected that blocking may be a factor.

Which option would be effective in determining if the block sizes are too large?

- A. Create an investigation routine using the blocking fields for each match pass.
- B. Review the match specification test results graph to determine blocking results.
- C. Add disagreement weight to key fields where appropriate to break apart matches.
- D. Analyze the blocking fields within the match specification to see if there are enough fields.

Answer: A

NO.4 What would happen if a special character is included in the SEPLIST and not in the STRIPLIST?

- A. That special character will be ignored.
- B. You will get an error when you test a statement.
- C. The token class for that character becomes the character itself.
- D. You need to enclose in double quotes any special characters in the SEPLIST that is not in the STRIPLIST.

Answer: C

NO.5 When exporting a rule set to a .dsx file, what check box options should be selected?

- A. All check boxes are selected.
- B. No check boxes are selected.
- C. The Exclude Read Only items check box is selected and the Include Dependent Items check box is cleared.
- D. The Exclude Read Only items check box is cleared and that the Include Dependent Items check box is selected.

Answer: A

NO.6 What will improve classifications if there are a large amount of "@" and "?" symbols in a standardization pattern report?

- A. Word with Advanced options.
- B. Word with special symbol processing options.
- C. Character Discrete on all unhandled patterns.
- D. Character Concatenate on selected columns.

Answer: A
